¹ As a result of Advanced Technology Institute's GREEN commitment and to provide the best value in education resources, ATI has implemented textbook recycling and extensive use of electronic textbooks. Arrangements have been made with publishers to access their content at heavily discounted rates and make it available to you at the start of each term. Student will have extended access (2-4 years) to core course textbooks. A STUDENT MAY OPT OUT AND ACQUIRE TEXTBOOKS ON THEIR OWN. If student prefers to own their textbook, they are available for purchase from the ATI bookstore, or other retailers. Federal regulations require that a student be allowed to acquire books and supplies from other sources.

² Most courses have online resources available, and many courses utilize mobile computing devices such as tablets and notebook PCs. Students will be charged for any resources not returned or damaged.
